ADICHUNCHANAGIRI INSTITUTE OF TECHNOLOGY
DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING

CHIKKAMAGALURU – 577102

E – MANTHANA 2K25

Technical Events organized by

YUKTA

FIXCUIT

Think Fast, Fix Faster

Event Details:

Date:5/11/2025

Venue: ECE Communication Lab (D-110)

Time:9am-1:30pm

Last Date:31/10/2025

Note: No Registration Fees.

Rules & Regulations

Team Structure

- Each team may consist of 2 participants.
- Participants from different departments are permitted.

Participants requirements

- Id card is compulsory for everyone.
- No need to carry anything. All necessary items like sheets and pen will be provided.
- Phones are not allowed during event, so don't carry mobile phones while participating.
- IC numbers will be provided so participants should know pin configurations and internal structure.

Rounds

Round 1:

Step 1 – Observation Round:

- Participants will be given a printed circuit diagram, which they must carefully

observe and compare with the actual circuit within 3 minutes.

- During this time, participants are not allowed to touch the circuit, make any changes, or mark anything on the circuit sheet.

Step 2 – Action Round:

- Participants will be given 2 minutes to fix or debug the actual circuit.
- Only the components provided may be used; no other modifications are allowed.

Step 3 – Correction Marking:

- Participants must mark the corrections on the provided circuit sheet.
- The actual circuit must not be touched during this time.
- Time allotted for marking: 1 additional minute.

Round 2:

- All required components will be provided.
- Boolean equation or circuit name will be announced at the start.
- Participants must implement the circuit and ensure the expected output is achieved.
- Each team will get 15 minutes to complete the task.
- Circuits must be built from scratch. There will be no faults to debug in this round.
- If participants fail to show correct output or request help, hints will be provided with a penalty. Points will be deducted for each hint taken.

Evaluation Criteria:

Round 1:

- How accurately faults are identified on the sheet.
- Speed in completing the debugging process.
- Maximum number of faults identified

Round 2:

- For Partial output, points will be deducted.
- If hints are taken, points will be reduced.
- Circuit Accuracy, speed, expected output in completing the debugging process.

Disqualification Scenarios:

- Improper handling or damage to hardware components.
- Copying from or collaborating with other teams.
- Failing to complete the fault-marking step.
